

Minibag Frames

Minibag Frames guarantee easy handling and optimum safety for your raw materials and finished products and are designed for your individual needs and requirements.

Minibag Frames support your Minibag logistic solution and are the perfect connecting element in every step of your production process – for short storage, movables or high-end double frame concepts.

Minibag Frames are available in aluminum and stainless steel. We offer a wide range of flexible and reliable solutions, customized for your production line.

The Advantages of the Minibag Pharma Solution

- Easy & safe handling
- Space-saving storage
- Compliant with GMP & EHS regulations
- Compliant with FDA, EU Pharmacopeia and USP regulations
- Maximum safety for sensitive raw materials and finished products
- No risk of cross-contamination due to exclusive use of minibag
- Suitable for roller conveyors
- Minimized cleaning costs
- Reliable and quick return on investment
- Strength and durability through heavy-duty stainless steel/aluminum combinations
- Double Frame Concept (Frame on Frame, Frame on Trolley)

Your Minibag Frame Options

- EU pallet-compliant square and rectangular frames
- Foldable or collapsible frame design
- Rollable frames
- High-bay warehouse design
- Successive or stackable design
- Forklift shoes
- Document holder
- Bottom adapter for mounting vents and industrial adapters
- Integrated valves: circular belt valve, iris valve, slider valve

Especially designed for the pharmaceutical industry, Minibag and Frame systems are the perfect solution for handling, storage and shipping of sensitive raw materials and products as certified according to DIN EN ISO 9001, ISO14001 and ISO15378.
